\_\_\_ Chrome Polish (\$35)

Sub Total = \_\_\_\_\_

### IMPORTANT

- There are 5 "Dirt" levels (D1 is Extremely cleaner than average, to D5, which is Extremely dirtier than average). The **SUB TOTAL PRICE** will be reduced or increased according to the following levels and their corresponding percentages.

Note: **MOST** vehicles should be D3, anything above or below must be noticeable enough to accurately predict a difference in **time of labor** (This requires honesty and integrity when quoting a vehicle).

[D1 = -20% decrease], [D2 = -10% decrease], [D3 = No change], [D4 = +10% increase], [D5 = +20% increase].

(Is This Brand New!?) (Not much to clean) (normal usage.) (Excessive build up) (Multiple years of build up!!)

[ TOTAL = \_\_\_\_\_ +/- ( \_\_\_\_\_ \* \_\_\_\_\_ ) ] Where "Dn" is percentage of price  
SUB TOTAL SUB TOTAL Dn increase from corresponding dirt level  
(i.e. D5 would be + 20% ) Remember,  
D3 does not change the sub total.  
(to enter 20% in a calculator, input ".20" or ".2")

TOTAL = \_\_\_\_\_
